

SPHINX

Smart Card Log-On Manager

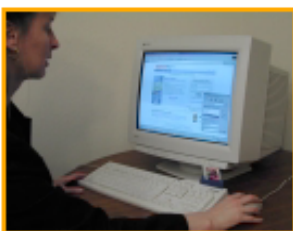

Computer Access and Password Management for Building Access Systems Easy to add to existing building access systems

- Add computer access to employee building access cards
- No re-badging required for existing installations
- No change required to existing cards or network infrastructure
- Works with contactless and hybrid cards
- Compatible with HID and INDALA building access cards

Provides additional security and convenience

- Enables secure logon to Windows
- Facilitates logon to networks, websites, and applications
- Stores user names and passwords for logon locations
- Stores personal and credit card information, for secure transfer to website entry fields
- All information in secure database, which can only be accessed when card is present

Note : All specifications are subject to change without notice
